Dear Hiring Manager / HR Department at Jadestone Energy,

I am writing to express my strong interest in the On-the-Job Training (OJT) opportunity at Jadestone Energy. As a recent Electrical Engineering graduate from Hasanuddin University with a GPA of 3.70, I am eager to bring my strong academic foundation and hands-on operational experience to the dynamic energy sector at Jadestone.

During my studies, I developed a solid understanding of power systems, energy management, system stability, and protection. This culminated in my thesis, which focused on designing a Transient Stability Analysis Software using MATLAB. My technical proficiency is further supported by my ability to utilize industry-standard software such as ETAP and MATLAB for electrical analysis.

Beyond my academic background, my internship experiences have prepared me for real-world industrial environments. At PT. United Tractors Tbk., I actively assisted the Service Management team in coordinating daily operations, evaluating department performance, and implementing process improvements. Previously, at PT. Pertamina Patra Niaga, I supervised LPG production and distribution, which gave me valuable insight into the operational and logistical aspects of the energy sector.

Furthermore, my tenure as the General Coordinator for the Relay, Measurement, Stability, and Control Laboratory has significantly strengthened my leadership, teamwork, and problem-solving abilities. I am highly motivated to learn from the industry experts at Jadestone Energy and am confident that my technical skills and disciplined work ethic will allow me to contribute positively to your operations.

Please find my CV attached to this email for more detailed information regarding my qualifications. Thank you for your time and consideration. I look forward to the possibility of discussing how my skills and ambitions align with Jadestone Energy.

Sincerely,

Julhandiansyah Putra
